

TSM offers a variety of bars to assist at the toilet. There are bars that straddle the toilet bowl and provide a firm grip for both arms, sidewall bars, corner bars, and even swingaway and swingup bars. Dimensions are centerline unless noted otherwise. Fastener kits are ordered separately (see page 23). Almost any bar shown can be modified to different dimensions. Let us know your requirements. See page 21 for custom bars.

These toilet bars are Q/CS-1 satin finish stainless steel with 1/4" (32mm) tubing and concealed screw flanges. Left hand is shown in each case except for the 2040M, which is not handed.

Toilet Wall-to-Floor Bars

3033 & 3033D: These surface-mounted bars utilize outriggers at floor to stabilize. If the bar is on the right when the user is sitting on the toilet, specify right hand. If reverse, specify left. **3033WX:** Provides the same function as the 3033 without outrigger at floor; however, the bar has a 4" extension set into a concrete floor. **3033Y:** Exceptionally sturdy design allows surface mounting without outrigger or extension. Satin stainless steel tubing and bright chrome-plated brass cover flanges slip over steel liners attached to wall and floor.
